

Installation Example
Pavement / Flagstone class A 15

The diagram illustrates the cross-section of a pavement installation. It shows a flagstone (A 15) resting on a bedding course, which is supported by a base course and a load bearing structure. The flagstone is shown with a joint, and the bedding course is shown with a joint. The base course and load bearing structure are shown with a joint. The diagram includes labels for the flagstone, bedding course, base course, and load bearing structure. It also includes a note about the classification of mortar and drain capacity according to DIN 18130-1.

Flagstone

Bedding course

If applicable elastic joint sealing

Pavement / Flagstone

Base course

Load bearing structure according to standard

Classification of mortar, drain capacity according to DIN 18130-1

<p>The installation examples / advise constantly are adapted to the technical conditions. With new editions older expenditures lose their validity. Before planning or installation please verify the current version at www.hauraton.com In building construction is a sealing layer below the channels necessary.</p> <p>The installation example represents a proven recommendation from HAURATON. The final responsibility for the execution lies with the planner in charge. Specific conditions of the project must be taken into account.</p> <p>** no limitation</p>		<p>Date: 01.03.2023</p>		<p>Our general installation instructions apply.</p>		<table><tr><td>Format DIN</td><td>A4</td></tr><tr><td>scale</td><td>1:5</td></tr></table>		Format DIN	A4	scale	1:5	<div><p>Unit 4, Frenchs Avenue LU6 1BH Dunstable / Bedfordshire United Kingdom</p><p>Tel. +44 1582 501380 TS-UK@hauraton.com</p></div>
